

First Aid Saves Lives

Be First On Scene

Medical research has found that the first **4 minutes** after a heart stoppage could make the difference between life and death. Performing CPR and AED defibrillation during this **prime time for rescue** greatly increases a patient's chance of survival.

Join us in being First On Scene!

1

When someone's heart stops, call 119 for help

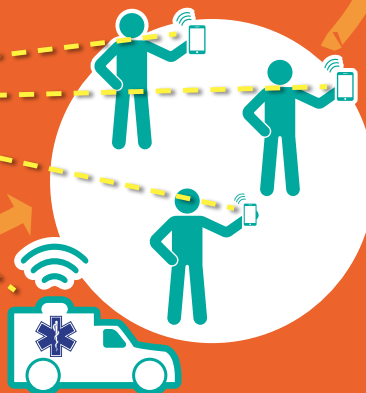

2

Launch the First On Scene app

3

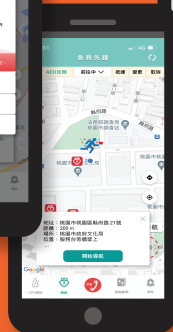

App notifies nearby First On Scene responders. First On Scene responders quickly arrive to perform CPR or pick up an AED

↑ Mission alert

↑ Navigation to and from AED

↑ AED arrives on scene

4

First On Scene responders deliver AEDs
